

COMPANY PROFILE

ABOUT THE COMPANY

With over 40 years of industry experience, the Electronica Group that was formed in 1973 has enjoyed loyal patronage and the reputation of quality over its four decades. Electronica Plastic Machines was a natural extension of the Electronica group that was involved in manufacturing of machine tools. Having installed base of 4000+ machines already, the Company has over 25 years of rich experience in providing state-of-the-art Plastic Injection Moulding Equipment Machines. A fully equipped machine shop and an in-house inspection facility enables us to have unforgiving standards in quality and have helped EPM retain loyal customers and earn goodwill in the field.

OUR RESOURCES

The entire 70,000 square feet of the manufacturing facility is dedicated towards providing customised solutions for our customers. Our well stocked injection molding machine shop is equipped to provide productive solutions as per the needs of our customers. We have extremely high standards of quality in molding machines and our in house quality inspection ensures that our products match international standards.

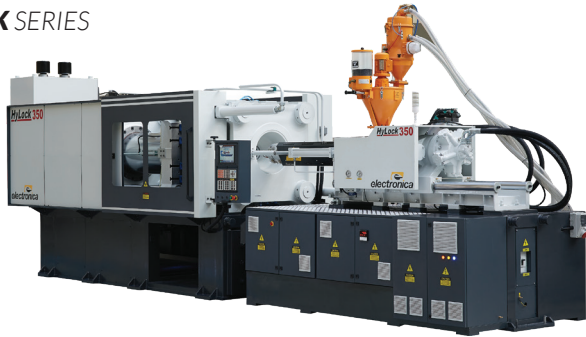

SALES AND SERVICE SUPPORT

EPM has a pan India presence with 12 offices at strategic locations to ensure swift and efficient customer response for all our plastic injection moulding machines. With its feet firmly grounded in the present but with a view to the future, EPM prides itself as a company that is focused on providing quality molding solutions that can be easily adapted to our client's needs. A trained customer care team makes the process of sales and service smooth and well organized. From detailed explanation of application and use to efficient solutions for specific needs, our customer care is dedicated towards making our clients satisfied. We are well equipped to handle any requirements for spares and our annual maintenance contracts enable timely servicing of machines supplied.

Electronica Plastic Machines provides the latest range in Plastic Injection Moulding Machines. We are renowned for our five point double toggle type machines, with best in class energy efficiency. The foremost name in the supply and export of engineering plastics and household plastic moulding machines, EPM has a rich experience of over four decades in the manufacturing and dealing of plastic injection moulding machines and it's allied auxillaries.

HYLOCK SERIES

Injection Moulding Machines

-  Clamping force from 450kN to 6500kN
-  Injection Capacity (ps) 64gms to 3505 gms
-  Application specific machines for PET, RPVC, CPVC, thin wall containers etc.
-  Available with Servo and Elektra Power Saver for energy efficient moulding

RETROFIT RANGE

-  **Servo Retrofit** for non-servo machines leading to higher energy saving, faster cycle time as well as precise and consistent operations.
-  **Elektra Power Saver** offers plug-and-play solution for standard machines leading to 20% to 60% energy saving depending on moulding conditions.
-  **Controller Retrofit-** State of the art controller. Fault diagnostics with plain text messages for easy troubleshooting. Internal storage of 200 mould data.

INDUSTRY 4.0 SOLUTIONS

e²M

-  Cloud based system with online data capture
-  Remote access allows for data access through any location globally.
-  Data analysis for any given period individual machine wise with detailed back history.
-  Automated MIS report on daily basis

EPM PRODUCT RANGE

Injection Moulding Machines

- : Optima Series
- : eProfit Series
- : Endura Series
- : Futura Series
- : Ventura Series
- : Hylock Series

Retrofit

- : Controller Retrofit
- : Servo Retrofit
- : Elektra Power Saver
